

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

278 *Publications of the Astronomical Society, &c.*

OFFICERS OF THE SOCIETY.

Mr. GEO. C. EDWARDS *President*
Mr. S. D. TOWNLEY *First Vice-President*
Mr. CHAS. S. CUSHING *Second Vice-President*
Mr. A. O. LEUSCHNER *Third Vice-President*
Mr. R. G. AITKEN } *Secretaries*
Mr. F. R. ZIEL }
Mr. F. R. ZIEL *Treasurer*
Board of Directors—Messrs. AITKEN, BURCKHALTER, CAMPBELL, CROCKER, CUSHING,
EDWARDS, LEUSCHNER, MILLER, PARDEE, TOWNLEY, ZIEL.
Finance Committee—Messrs. CUSHING, LEUSCHNER, ———.
Committee on Publication—Messrs. AITKEN, SCHLESINGER, TOWNLEY.
Library Committee—Messrs. TOWNLEY, BABCOCK, MISS O'HALLORAN.
Committee on the Comet-Medal—Messrs. CAMPBELL (*ex-officio*), CROCKER, BURCKHALTER.

OFFICERS OF THE CHICAGO SECTION.

Executive Committee—Mr. RUTHVEN W. PIKE.

OFFICERS OF THE MEXICAN SECTION.

Executive Committee—Mr. FELIPE VALLE.

NOTICE.

The attention of new members is called to Article VIII of the By-Laws, which provides that the annual subscription, paid on election, covers the *calendar* year only. Subsequent annual payments are due on January 1st of each succeeding calendar year. This rule is necessary in order to make our book-keeping as simple as possible. Dues sent by mail should be directed to Astronomical Society of the Pacific, 819 Market Street, San Francisco.

It is intended that each member of the Society shall receive a copy of each one of the *Publications* for the year in which he was elected to membership and for all subsequent years. If there have been (unfortunately) any omissions in this matter, it is requested that the Secretaries be at once notified, in order that the missing numbers may be supplied. Members are requested to preserve the copies of the *Publications* of the Society as sent to them. Once each year a title-page and contents of the preceding numbers will also be sent to the members, who can then bind the numbers together into a volume. Complete volumes for past years will also be supplied, to members only, so far as the stock in hand is sufficient, on the payment of two dollars per volume to either of the Secretaries. Any non-resident member within the United States can obtain books from the Society's library by sending his library card with ten cents in stamps to the Secretary A. S. P., 819 Market Street, San Francisco, who will return the book and the card.

The Committee on Publication desires to say that the order in which papers are printed in the *Publications* is decided simply by convenience. In a general way, those papers are printed first which are earliest accepted for publication. It is not possible to send proof sheets of papers to be printed to authors whose residence is not within the United States. The responsibility for the views expressed in the papers printed rests with the writers, and is not assumed by the Society itself.

The titles of papers for reading should be communicated to either of the Secretaries as early as possible, as well as any changes in addresses. The Secretary in San Francisco will send to any member of the Society suitable stationery, stamped with the seal of the Society, at cost price, as follows: a block of letter paper, 40 cents; of note paper, 25 cents; a package of envelopes, 25 cents. These prices include postage, and should be remitted by money-order or in U. S. postage stamps. The sendings are at the risk of the member.

Those members who propose to attend the meetings at Mount Hamilton during the summer should communicate with "The Secretary Astronomical Society of the Pacific" at the rooms of the Society, 819 Market Street, San Francisco, in order that arrangements may be made for transportation, lodging, etc.

PUBLICATIONS ISSUED BI-MONTHLY.
(February, April, June, August, October, December.)

INDEX TO VOLUME XVI.

Catalogue of the Library of the Astronomical Society of the Pacific, by S. D. TOWNLEY	157
CHESTER, C. M., Report on the Naval Observatory, Washington, D. C., for 1903	104
Climatology of California, by A. G. McADIE, Review of by S. D. TOWNLEY	150
Comet :—	
Brooks, Note on, by R. G. AITKEN	34
a 1904, Elements of, by R. G. AITKEN and J. D. MADDRILL	145
Note on, by R. G. AITKEN	145
BORRELLY'S, Photographs of, by S. ALBRECHT	62
Comets, Note on the Unsuccessful Search for Periodic, by R. G. AITKEN	216
COMSTOCK, G. C., Report on the Washburn Observatory for 1903	112
Constant of Refraction, The, by R. T. CRAWFORD	78
CRAWFORD, R. T., The Constant of Refraction	78
CURTIS, H. D., A Brief Review of Recent Progress in Solar Physics, 133; Definitive Orbit of the Spectroscopic Binary <i>i Pegasi</i> , 117; On Some Results Obtained by the D. O. Mills Expedition to the Southern Hemisphere	222
CURTISS, R. H., A Proposed Method for the Measurement and Reduction of Spectrograms for the Determination of the Radial Velocities of Celestial Objects, with an Application to a Study of the Variable Star <i>W Sagittarii</i> , 243; On the Spectra of <i>R Scuti</i> and <i>W Cygni</i> , 270; The Radial Velocities of <i>S Sagitta</i> and <i>Y Sagittarii</i>	268
D. O. Mills Expedition to Chile, Note on the Observatory of the, by W. W. CAMPBELL	144
Dedication of the Students' Observatory at Berkeley	65
Double Stars :—	
<i>Castor</i> a Quadruple Star, by W. W. CAMPBELL	260
Duplicity of 31β <i>Leonis Minoris</i> , by W. J. HUSSEY	270
<i>ϵ Hydrae</i> , AB, Recent Measures of, by R. G. AITKEN	118
A New Companion to Σ 1506, and Two New Naked-Eye Double Stars, by R. G. AITKEN	119
New Companions to Two Known Double Stars, by R. G. AITKEN	268
Note on β 346 = <i>Librae</i> 23, by R. G. AITKEN	144
Note on the Double Star O Σ 21, by R. G. AITKEN	215
Note on One Hundred and Fifty-five New Double Stars, by R. G. AITKEN	217
On Double Stars, by R. G. AITKEN	235
GELDERN, OTTO VON, Address of the Retiring President of the Society in Awarding the Bruce Medal to Sir WILLIAM HUGGINS	49

General Notes	35, 120, 146, 223, 272
GILLIHAN, A. F., The Photographic Equatorial of the Students' Observatory at Berkeley	89
GRIGG, J., A Brief Account of the Observatory at Thames, New Zealand	28
HOWE, H. A., Report on the Chamberlin Observatory for 1903	107
HUGGINS, Sir WILLIAM, Award of the Bruce Medal to	49, 124
HUSSEY, W. J., Duplicity of 31β <i>Leonis Minoris</i>	270
Introductory Remarks at the Dedication of the Students' Observatory at Berkeley, by W. W. CAMPBELL	65
KÖHL, TORVALD, Astronomical Observations in 1903	25
LANGLEY, S. P., Report on the Astrophysical Observatory of the Smithsonian Institution for 1903	107
LEUSCHNER, A. O., History and Aims of the Students' Observatory at Berkeley	68
Lick Observatory:—	
Crocker Eclipse Expeditions of 1905	217
Distinguished Visitors to the	269
Lalande Prize Awarded to Director CAMPBELL	32
The Observatory of the D. O. Mills Expedition to Chile	144
On Some Results Obtained by the D. O. Mills Expedition to the Southern Hemisphere	222
New Mounting for the Crossley Three-foot Mirror	266
The Publication of the Crossley Reflector Photographs of Nebulæ and Star Clusters	219
Notices from the	32, 117, 144, 215, 260
Loss of Light by Absorption and Reflection in the 36-inch Objective, by J. H. MOORE	202
Loss of Light by Diffraction at a Narrow Slit, by J. H. MOORE	203
Lunar Rill in Valley of the Alps, Observations of a, by C. D. PERRINE	264
<i>Lyra</i> , The Ring Nebula in, by B. L. NEWKIRK	13
MADDRILL, J. D., Elements of Comet <i>a</i> 1904 (with R. G. AITKEN)	145
MCCLEAN, FRANK, Note on the Death of	272
MCNEILL, M., Planetary Phenomena	29, 99, 141, 210, 212, 241
Meteors, Observations of, by TORVALD KÖHL	27
MILLER, J. A., Report on the Kirkwood Observatory for 1903	106
MONCK, W. H. S., The Sun's Velocity in Space	189
Moon, The, by W. H. PICKERING. Review of, by R. G. AITKEN	42
MOORE, J. H., Loss of Light by Absorption and Reflection in the 36-inch Objective, 202; Loss of Light by Diffraction at a Narrow Slit	203

NEWKIRK, B. L., The Ring Nebula in <i>Lyra</i> , 13; The Watson Asteroids	85
Observatories, Reports of, for 1903:—	
The Naval Observatory, Washington, D. C., by C. M. CHESTER .	104
The Kirkwood Observatory, by J. A. MILLER	106
The Chamberlin Observatory, by H. A. HOWE	107
The Smithsonian Astrophysical Observatory, by S. P. LANGLEY .	107
The Cincinnati Observatory, by J. G. PORTER	109
The Harvard College Observatory, by E. C. PICKERING . . .	109
The Washburn Observatory, by G. C. COMSTOCK	112
The Vassar College Observatory	115
The International Latitude Observatory at Ukiah, by S. D. TOWNLEY	115
Observatory at Greenwich, Note on the Work of the	229
Observatory at Thames, New Zealand, a Brief Account of the, by J. GRIGG	28
O'HALLORAN, ROSE, A Few Details of the Twelve-Year Sunspot Cycle, 93; Variable Star Notes	101, 207
Nebulæ, The Number of the, by C. D. PERRINE	265
PERRINE, C. D., A Division of the Stars in Some of the Globular Clusters, According to Magnitude, 263; Experimental Determination of the Solar Parallax from Negatives of <i>Eros</i> Made with the Crossley Reflector, 267; A New Mounting for the Crossley Three-foot Mirror, 266; The Number of the Nebulæ, 265; Observations of a Rill Extending through the Lunar Valley of the Alps, 264; Observations of <i>Phæbe</i> , the Ninth Satellite of <i>Saturn</i> , 267; The Supporting and Counterweighting of the Principal Axes of Large Telescopes	97
Photographic Equatorial of the Students' Observatory, The, by A. F. GILLIHAN	89
PICKERING, E. C., Report on the Harvard College Observatory for 1903	109
Planetary Phenomena, by M. McNEILL	29, 99, 141, 210, 212, 241
PORTER, J. G., Report on the Cincinnati Observatory for 1903 . .	109
Radial Velocities of <i>S Sagittæ</i> and <i>Y Sagittarii</i> , The, by R. H. CURTISS	268
Refraction, The Constant of, by R. T. CRAWFORD	78
Ring Nebula in <i>Lyra</i> , The, by B. L. NEWKIRK	13
ROBERTS, ISAAC, Note on the Death of	228
<i>Saturn</i> , Observations of <i>Phæbe</i> , the Ninth Satellite of, by C. D. PERRINE, 267; Note on	272
SMITH, ELLIOTT, Star Catalogues	193
Solar Parallax, Experimental Determination of the, by C. D. PERRINE	267

Solar Physics, A Brief Review of Recent Progress in, by H. D. CURTIS	133
Spectra of <i>R Scuti</i> and <i>W Cygni</i> , On the, by R. H. CURTISS	270
Spectrograms, A Proposed Method for the Measurement and Reduction of, for the Determination of the Radial Velocities of Celestial Objects, with Application to a Study of the Variable Star <i>W Sagittarii</i> , by R. H. CURTISS	243
